***Comprehensive
services in
environmental
and
land management***

Karl Blattmann M.Sc.

danu environmental services

danu environmental services is ready to help Yukon First Nations' governments meet their goals to responsibly and sustainably manage Settlement Lands, participate in environmental assessments, and ensure their interests are fully respected by all visitors to the traditional territories.

The signing of final agreements has brought incredible opportunity—and challenges—to Yukon First Nations.

des can help your government achieve its goals in land management.

The retention of qualified personnel can be challenging. **des** is ready to lend assistance where staff require guidance or assistance.

land management

des offers a number of comprehensive products that can be tailored to meet your individual needs. As your government grows, **des** will adapt to grow with you and your changing goals.

Managing settlement lands requires planning, expertise and commitment. **des** can help your government grow to become a mature and modern administrator of lands.

- Land management systems auditing
- Legislation, regulation and policy recommendations
- Land inspection procedure development
